Employers seek and reward employees with the skills and knowledge to send messages across the country via e-mail; use a spreadsheet to create a graph and paste it into a report; add and edit data in a database; understand the implications of file sizes, memory limitations, and network arrangements; and recognize the function and features of modern computer components. This course is a great introduction to Windows 10 and Office 2016 and is designed to provide the fundamental computer competencies you need to survive and prosper in today's fast-changing workplace. You will learn how to implement the powers of modern office software to work faster and more efficiently. We'll focus on practical application for software most common to the workplace. When you finish this course, you will have learned why employers consider technological literacy so critical to the success of any organization.
